

CYBER INSURANCE

If you understand the value of your data and IT systems – you’ll understand the value of expert cyber insurance.

Data and systems are key assets for most companies because without them you cease to exist. iTOO Cyber Insurance provides your business with access to expert knowledge and resources to effectively manage and recover from a cyber incident.

Why get your Cyber Liability covered by iTOO?

Far broader than the name cyber would imply, our policy extends to cover numerous incidents including but not limited to:

- Cyber extortion and malware (viruses, ransomware, or publishing of stolen data).
- Denial of service (disruption to operations).
- Downstream attack (a compromise of your environment resulting in damages to others).
- Hacking.
- Insider and privilege misuse (unauthorised access and use of systems and data by employees and service providers).
- Physical theft and loss (both devices and physical hard copy data).
- Threats posed by third party access into a client environment.

We are different

Our cyber insurance offering includes a defined incident response process including a wide range of experienced specialists with a local presence as well as global experience and expertise, spanning the following key areas:

IT response costs to understand, mitigate and recover from the incident.

Crisis communications and public relations costs, to reduce potential reputational damage and customer churn.

Notification and remediation services, to prevent affected parties suffering further damages.
